1.0 INTRODUCTION

Dakota Access, LLC (Dakota Access) contracted with Merjent, Inc. (Merjent) to assist in obtaining environmental data and permits associated with the Dakota Access Pipeline Project (DAPL Project) within North Dakota. The DAPL Project is approximately 1,134 miles in length and will transport crude oil from Stanley, North Dakota, to Pakota, Illinois. The North Dakota portion of the DAPL Project is approximately 358.5 miles in length (which consists of approximately 148 miles of the Supply Line and approximately 210 miles of the Mainline) and crosses seven counties (Mountrail, Williams, McKenzie, Dunn, Mercer, Morton, and Emmons).

The purpose of this report is to describe the methods and results of the wetland and waterbody delineations that were conducted during the 2014 growing season for the North Dakota portion of the DAPL Project.

2.0 METHODS

2.1 FIELD DETERMINATIONS

The wetland and waterbody field delineations were conducted from August 2014 through November 2014 along the DAPL Project route within a 400-foot survey corridor. Field crews assessed wetlands and waterbodies within the 400-foot survey corridor where survey permission was granted and where vegetation was suitable for assessment. Some areas were not assessed in 2014 due to either lack of survey access, crop restrictions, vegetation die-back, or weather conditions. Field-based wetland and waterbody delineations will continue during the 2015 growing season.

2.1.1 Wetlands

Wetland investigations were conducted using the on-site methodology set forth in the 1987 USACE Wetlands Delineation Manual (1987 Manual) and the 2010 USACE Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Great Plains Region (Regional Supplement). In addition to the 1987 Manual and the Regional Supplement, wetland areas were examined through analysis of the vegetation, soils, and hydrology as described in the Classification of Wetland and Deepwater Habitats of the United States (Cowardin et al. 1979) and The National Wetland Plant List (Lichvar et al. 2014).

2.1.2 Waterbodies

Waterbodies were identified and classified according to their Cowardin classification as either ephemeral (R6), intermittent (R4SB), or perennial (R3UB, R2US). Waterbodies were generally identified as streams or rivers with an Ordinary High Water Mark (OHWM), and lacked wetland characteristics. Waterbodies with an OHWM of 10 feet or less in width were located by walking the centerline of the waterbody (or as close to the centerline as possible). Waterbodies with an OHWM greater than 10 feet were delineated along the edge of each bank.

2.2 DESKTOP ANALYSIS

A desktop analysis to identify wetlands and waterbodies was conducted along the 400-foot corridor where surveys were not completed in 2014. These areas will be field verified as landowner access allows during the 2015 growing season.

2.2.1 Wetlands

The best available data were used in ArcGIS and include the U.S. Fish & Wildlife Service’s National Wetland Inventory (NWI) dataset, aerial imagery, and topography. Polygons were drawn in ArcGIS by an experienced biologist who used professional judgment with regard to the presence/absence of wetland features based on aerial images, the NWI dataset, and topography.

2.2.2 Waterbodies

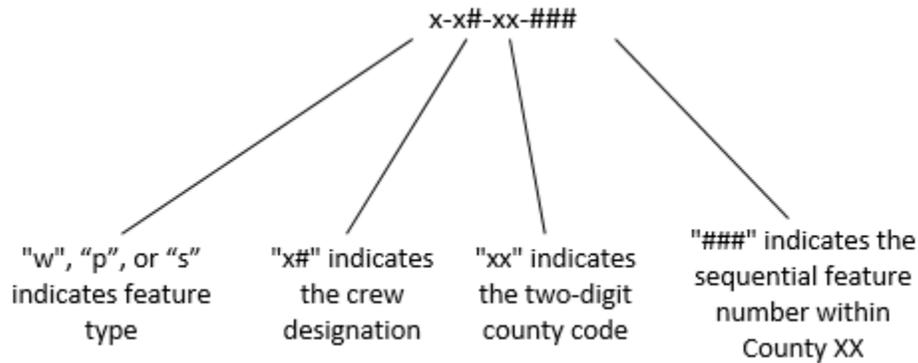

The best available data were used in ArcGIS and included the U.S. Geologic Survey’s National Hydrography Dataset (NHD), aerial imagery, and topography. Polygons were drawn in ArcGIS by an experienced biologist who used professional judgment with regard to the presence/absence of wetland features based on aerial images, the NHD, and topography. Naming Conventions

Wetland and waterbody feature nomenclature is specific to the DAPL Project is labeled in accordance with the methods outlined below. The general format for unique IDs includes a feature type, county code, crew designation, and a sequential three-digit feature identifier. The county codes for North Dakota are also specific to the DAPL Project is used based on the abbreviations in Table 2.3-1. Each crew lead was be given a crew designation at the beginning of the field season to differentiate their data from other crew leads and to eliminate any unnecessary coordination with other crews working in the same county for sequential feature numbering purposes.

Table 2.3-1	
North Dakota County Abbreviations	
County	Abbreviation
Mountrail	MT
Williams	WI
McKenzie	MK
Dunn	DU
Mercer	ME
Morton	MO
Emmons	EM

All features were labeled using a nomenclature that includes a feature type, crew designation, county code, and a sequential feature identifier. Feature types were deciphered by using “w” for wetland, “p” for ponds and lakes, and “s” for streams and rivers. Features that were desktop delineated by Merjent are titled with a “d” in lieu of a crew designation.

Figure 1: Feature Naming Convention

For example, w-k1-du-001 would be the first wetland delineated by Crew K1 in Dunn County, and w-m1-em-015 would be the fifteenth wetland mapped by Crew M1 in Emmons County. An example of a desktop delineated wetland would be w-d-mo-003 and would represent the third desktop delineated wetland in Morton County.

For example, p-k1-du-001, would be the first pond delineated by Crew K1 in Dunn County, and p-m1-em-015 would be the fifteenth lake by Crew M1 in Emmons County. An example of a desktop delineated lake or pond would be p-d-mo-003 and would represent the third desktop delineated lake or pond in Morton County.

For example, s-k1-du-001 would be the first waterbody collected by Crew K1 in Dunn County, and s-m1-em-015 would be the fifteenth waterbody delineated by Crew M1 in Emmons County. An example of a desktop delineated waterbody would be p-d-mo-003 and would represent the third desktop delineated waterbody in Morton County.

3.0 RESULTS

During the 2014 survey effort field crews surveyed 69.41 percent of the Supply Line and 56.61 percent of the Mainline (see Table 3.0-1). Field-based wetland and waterbody delineations will continue in 2015 when conditions are suitable and access is available.

Table 3.0-1				
Field Survey Progress for the DAPL Project by County				
County	Mile Post Range	Total Miles	Miles Completed	Percent Complete
Supply Line				
Mountrail County	0-23	22.49	16.45	73.15%
Williams County	24-93	73.84	49.06	66.44%
McKenzie County	94 - 142.47	51.83	35.57	68.63%
SUPPLY LINE TOTALS:		148.15	101.08	69.41%
Mainline				
McKenzie County	0 - 11	10.52	2.36	22.41%
Dunn County	12-63	52.20	16.69	31.98%
Mercer County	64 - 89	28.47	26.71	93.80%
Morton County	90 - 160	72.74	47.75	65.65%
Emmons County	161 - 203.5	46.22	31.98	69.19%
MAINLINE TOTALS:		210.15	125.49	56.61%

A total of 437 wetlands (field and desktop delineated) are crossed by the DAPL Project (see Table 3.0-2). These features are shown in tabular format in Appendix A. A total of 211 waterbodies (field and desktop delineated) are crossed by the DAPL Project (see Table 3.0-2). These features are shown in tabular format in Appendix B.

Table 3.0-2				
Summary of Wetland and Waterbody Survey Results				
Pipeline Segment	Feature type	Number of Features Crossed	Acres within 400' Survey Corridor	Construction Impacts (acre)
Supply Line	Wetlands			
	PFO	2	3.58	0.47
	PUB	34	21.78	4.14
	PEM	170	137.57	33.78
	Waterbodies			
	Perennial	23	21.88	3.71
	Intermittent	29	3.79	0.83
	Ephemeral	14	0.74	0.15
Mainline	Wetlands			
	PFO	2	8.91	0.48
	PUB	26	3.30	0.47
	PEM	203	95.80	21.25
	Waterbodies			
	Perennial	57	74.16	16.91
	Intermittent	54	9.54	2.19
	Ephemeral	34	1.35	0.36

All field and desktop delineated wetlands and waterbodies are shown spatially in the Environmental Features Map set, which is included as Exhibit A.4 of the DAPL Project North Dakota Public Service Commission Combined Application For Certificate Of Corridor Compatibility and Route Permit. The associated USACE Wetland Determination Forms for the field delineated wetland features are included as Appendix C (available upon request), and the Wetland Community Forms with corresponding photographs are attached as Appendix D (available upon request). The Waterbody Community Forms and accompanying photographs are included as Appendix E (available upon request).
